Request for Requirements, ORR 12029

The following requirements are submitted for exploitation of the dry cell batteries manufactured in Communist China:

1. List material inputs.
 - a. Record weight of each material input.
 - b. Estimate the cost of each material input.
2. Estimate cost of the batteries.
 - a. Breakdown total cost by labor, materials and capital costs.
 - b. State volume of output upon which the cost estimate is based.
 - c. State method of manufacture assumed or deduced upon which cost estimate is based.
3. Evaluate quality of the batteries.
 - a. Compare with similar US batteries.
 - (1) Workmanship.
 - (2) Quality of materials.
 - b. State probable shelf life of batteries.
 - c. State operating characteristics of batteries.
 - d. Would these batteries meet US military standards?
 - e. How well would these batteries satisfy the ordinary requirements placed on batteries of this type.
